REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-22 are allowed, as the prior art of record does not teach or suggest a magnetic resonance antenna having a longitudinal axis, including two switching lines connected in common to the radio frequency switching elements from an exterior of the birdcage structure and transversely to the longitudinal antenna rods, in combination with the remaining limitations of the claims.

Claims 23-24 are allowed, as the prior art of record does not teach or suggest a method for detuning an eigen-resonance frequency of a magnetic resonance antenna having a birdcage structure with a longitudinal axis formed by a plurality of parallel, longitudinal antenna rods and antenna ferrules respectively connected at opposite ends of the antenna rods in terms of the radio frequency, including two switching lines connected in common to the radio frequency switching elements from an exterior of the birdcage structure and transversely to the longitudinal antenna rods, in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
